MAJESTIC MINERAL FIBER PANELS

Mineral Fiber panels are the most advanced and widely-used ceiling tile products. They are the most commonly used products in suspended ceiling installations due to their high acoustic value, ease of replacement and reasonable price.

During the last 10 years, our Majestic brand has established itself within the market by catering to both government buildings and architectural projects with its high quality and aesthetic look.

Majestic panels provide the degree of acoustic value, resistance to humidity, fire resistance, and light reflection that customers seek in mineral fiber ceiling tiles, and provide effortless solutions to your architectural needs.
